Sir:

Prior to examination of this continuation application, kindly amend the above-identified
application as follows:

IN THE CLAIMS

3. A process as claimed in [either of claims 1 and 2] claim 1, wherein liquid polyethylene glycol is used as solvent for the free-radical initiator at room temperature.
4. The use of the polymers prepared by a process as claimed in claim 1 [any of claims 1 to 3] as coating agents, binders and/or film-forming excipients for pharmaceutical dosage forms.
5. The use of the polymers prepared by a process as claimed in claim 1 [any of claims 1 to 3] as additives to cosmetic, hygienic and/or dermatological preparations.

6. A cosmetic, dermatological, hygienic or pharmaceutical dosage form comprising at least one of the polymers prepared by a process as claimed in claim 1 [claims 1 to 3] in addition to conventional excipients.

REMARKS

The claims have been amended to eliminate multiple dependency. No new matter has been added. A clean copy of the claims is attached.

Entry of the above amendment is respectfully solicited.

Respectfully submitted,
